

## **OxySure Systems (OXYS) Appoints PP Aviation Corp. as Military Drone Distributor**

**Frisco, TX**, July 23, 2015 – OxySure Systems, Inc. (OTCQB: OXYS) (OxySure, or the Company), the medical device innovator of life-saving easy-to-use emergency oxygen solutions with its “oxygen from powder” technology, today announced the appointment of PP Aviation Corporation (PPA) as a non-exclusive distributor of its medical drones into military markets.

PPA is experienced in the business of promoting and selling military products and oxygen equipment for military and aviation applications, including the US Army, US Air Force, US Navy, US Marines, Green Berets, Special Operations forces, and other military organizations and Foreign Military Sales.

Commented Tom Przybyla, President of PPA: “We are eager to get started with the OxySure drone platform for medical applications and our military customers have expressed strong interest. We look forward to expanding our relationship with OxySure to include the exciting opportunities presented by the drone era and more specifically as it relates to medical emergency and combat situations.”

“We have a long history with PPA and the drone distribution agreement with PPA makes logical sense,” stated Julian Ross, CEO of OxySure. “We are taking those steps needed to be ready to effectively present our solutions to our customers as we await our regulatory approval for commercial drone usage.”

### **About OxySure Systems, Inc.**

OxySure Systems, Inc. (OXYS) is a medical technology company that focuses on the design, manufacture and distribution of specialty respiratory and medical solutions. The company pioneered a safe and easy to use solution to produce medically pure (USP) oxygen from two dry, inert powders. The company owns numerous issued patents and patents pending on this technology which makes the provision of emergency oxygen safer, more accessible and easier to use than traditional oxygen provision systems. OxySure's products improve access to emergency oxygen that affects the survival, recovery and safety of individuals in several areas of need: (1) Public and private places and settings where medical emergencies can occur; (2) Individuals at risk for cardiac, respiratory or general medical distress needing immediate help prior to emergency medical care arrival; and (3) Those requiring immediate protection and escape from exposure situations or oxygen-deficient situations in industrial, mining, military, or other "Immediately Dangerous to Life or Health" (IDLH) environments.
