

OxySure Model 615 used 18 Times during Special Olympics

Frisco, Texas, August 6, 2015 – OxySure Systems, Inc. (OTCQB: OXYS) (OxySure, or the Company), the medical device innovator of life-saving easy-to-use emergency oxygen solutions with its “oxygen from powder” technology, today announced the Company’s OxySure Model 615 portable emergency oxygen device was used eighteen times during the Special Olympics World Games which took place July 25 - August 2, 2015 in Los Angeles.

The Special Olympics World Games was the largest sports and humanitarian event anywhere in the world in 2015. OxySure was a Champion of the World Games and the official supplier of OxySure Model 615 units, Automated External Defibrillators (AEDs), oxygen pulse oximeters and other medical emergency equipment and services. OxySure provided support to the medical operations of the Games to enhance the medical emergency needs of the 7,000 athletes and 3,000 coaches from 177 countries during their nine days in Los Angeles.

“We feel honored to have played a role in providing a safety net and serving the medical emergency needs of the Special Olympics World Games,” said Julian Ross, CEO of OxySure. “And knowing that our product was successfully used in eighteen saves makes it that much more meaningful.”

About OxySure Systems, Inc.

OxySure Systems, Inc. (OXYS) is a medical technology company that focuses on the design, manufacture and distribution of specialty respiratory and medical solutions. The company pioneered a safe and easy to use solution to produce medically pure (USP) oxygen from two dry, inert powders. The company owns numerous issued patents and patents pending on this technology which makes the provision of emergency oxygen safer, more accessible and easier to use than traditional oxygen provision systems. OxySure's products improve access to emergency oxygen that affects the survival, recovery and safety of individuals in several areas of need: (1) Public and private places and settings where medical emergencies can occur; (2) Individuals at risk for cardiac, respiratory or general medical distress needing immediate help prior to emergency medical care arrival; and (3) Those requiring immediate protection and escape from exposure situations or oxygen-deficient situations in industrial, mining, military, or other "Immediately Dangerous to Life or Health" (IDLH) environments. www.OxySure.com

Forward-Looking Statements

This release contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Statements contained in this release that are not historical facts, including, without limitation, statements that relate to the Company's expectations with regard to the future impact on the Company's results from new products in development, may be deemed to be forward-looking statements. Words such as "expects", "intends", "plans", "may", "could", "should", "anticipates", "likely", "believes" and words of similar import also identify forward-looking statements. These statements are subject to risks and uncertainties. Forward-looking statements are based on current facts and analyses and other information that are based on forecasts of future results, estimates of amounts not yet determined and assumptions of management. Readers are urged not to place undue reliance on the forward-looking statements, which speak only as of the date of this release. Except as may be required under applicable law, we assume no obligation to update any forward-looking statements in order to reflect any event or circumstance that may arise after the date of this release. Additional information on risks and other factors that may affect the business and financial results of OxySure Systems, Inc. can be found in the filings of OxySure Systems, Inc. with the U.S. Securities and Exchange Commission.
