

OxySure Therapeutics (OXYS) Provides Corporate Update

Frisco, Texas, USA, April 18, 2016 – OxySure Therapeutics, Inc. (OTCQB: OXYS) (“OxySure,” or the “Company”), a global leader and medical device innovator of life-saving, easy-to-use emergency oxygen products with its “oxygen from powder” technology and other innovative emergency medical solutions today provided a corporate update.

The Company announced that it had effected a reverse split of its common stock at a ratio of 1-for-50. The reverse split is subject to the Financial Industry Regulatory Authority (FINRA) declaring it effective. In addition, the Board of Directors made the decision that, in the light of many factors at this time, the cost of continuing the Company’s public filings are outweighing the benefits for the foreseeable future. For that reason, the Company filed a notice of termination to suspend its duty to file reports with the Securities and Exchange Commission.

The Board of Directors thanked all the Company’s stakeholders for their continued support as the Company kept moving forward.

About OxySure Therapeutics, Inc.

OxySure Therapeutics, Inc. (OTCQB: OXYS) is a medical technology company that focuses on the design, manufacture and distribution of specialty respiratory and medical solutions. The company pioneered a safe and easy to use solution to produce medically pure (USP) oxygen from inert powders. The company owns numerous issued patents and patents pending on this technology which makes the provision of emergency oxygen safer, more accessible and easier to use than traditional oxygen provision systems. OxySure's products improve access to emergency oxygen that affects the survival, recovery and safety of individuals in several areas of need: (1) Public and private places and settings where medical emergencies can occur; (2) Individuals at risk for cardiac, respiratory or general medical distress needing immediate help prior to emergency medical care arrival; and (3) Those requiring immediate protection and escape from exposure situations or oxygen-deficient situations in industrial, mining, military, or other "Immediately Dangerous to Life or Health" (IDLH) environments. *In addition to oxygen products for public/lay responder usage, OxySure also markets emergency medical solutions including AEDs (Cardiac Science, Philips, Zoll, Physio Control, Defibtech, and HeartSine), Quickclot Bleeding Control solutions, resuscitation products and pulse oximetry products.* www.OxySure.com
